Frontera building momentum, completes 3rd Project in Q1

Offshore operations cease the 2nd week of May

Cd. del Carmen, Campeche, Mexico, May 8, 2017–

Frontera's Mexican unit, Frontera Offshore SA de CV, continues to find success in the recovering subsea market in Mexico. Mobilizing in December of 2017, Frontera completed several work scopes during Q1 of 2018. The projects were part of the pre-lay stabilization campaign of the Sur de Texas-Tuxpan pipeline for TransCanada. Along with their ROV services partner, M2 Subsea, Frontera successfully completed the stabilization work in early March. In parallel, they also completed shallow water diving work scope with diving services company Aqueos Corp.

Looking forward, Frontera and its partners in the region, are targeting several more opportunities which are to be executed over the course of this year. Projects range from pipeline survey and stabilization works, mooring system installations, as well as laying and trenching of a fiber optic cable in the shallow waters off Tabasco. Projects are expected to get off the ground in the second half of the year.

"It has been a good start to 2018 for us, and we hope to have continued success in the second half of the year." –Brad McNeill, CEO, Frontera
